Welcome to our 2019 on farm sale at Tikana.

Having reached the milestone of joining the Gold Card Club (well one of us has) allows me to reminisce. Sixteen years ago at our first on farm sale we had no 3 year old bulls cutting EWSupreme velvet. Six years ago we had three sale bulls with EWSupreme velvet and this year we have sixteen. While feeding underpins velvet production, being such a visible trait with high heritability makes progress relatively easy.

Genetics have the potential to enable the deer industry to make quantum leaps. To date we have barely scratched the surface and so we are heading into very exciting times in the years ahead.

Unlike velvet most other genetic traits we measure are not visible. There are two which we see having a significant impact in future. CARLA measures the immune response of deer to parasite challenge. Eye Muscle Area scanning provides a tool to select for a higher dressing out percentage but also tenderness of venison. The cost per animal to test for both (at around 10 months of age) is less than \$25. Just imagine over time the impact on a commercial herd if you use these two traits in selecting replacement hinds!!

No matter what livestock sector you farm in the message around purchasing a sire animal is the same. Know your farm goals and choose a stud breeder who is making genetic improvements in those traits that will help you achieve your goals. A Genetic Trend Graph shows how a breed is performing over time for any particular trait. In the following pages the green line shows the progress of 23 Wapiti herds and the dotted line shows how Tikana is performing relative to those other Wapiti herds.

We are more than happy to explain how genetics can benefit you – based on sound science and not a sales pitch. Prospective purchasers are welcome to visit us on farm prior to sale day. Just give us a call to arrange a time to view the animals and discuss how best we can accommodate your requirements.

We thank past purchasers and welcome you and new buyers to our 2019 offering.

Dave Lawrence & Donna Day

www.tikanawapiti.co.nz

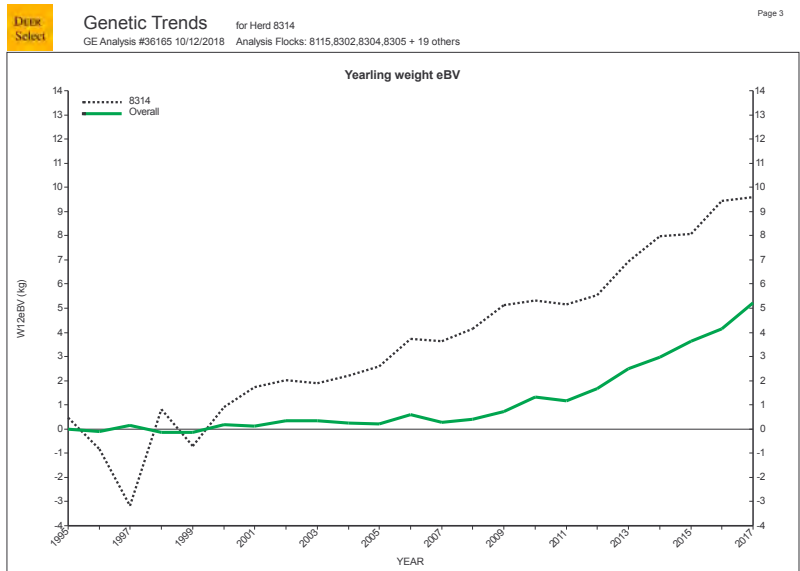

GENETIC TREND GRAPHS

The solid green line represents the Wapiti average (23 herds).
The dotted line is Tikana herd average (Herd number 8314)

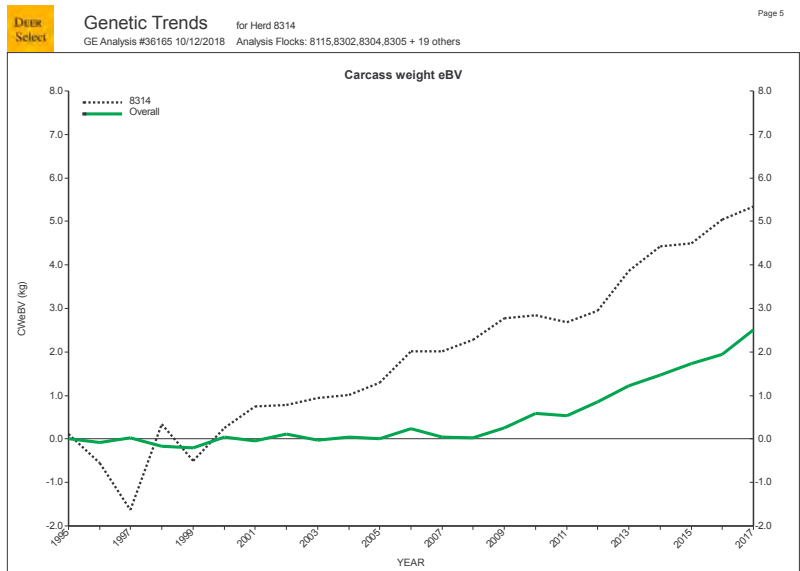

GROWTH = Yearling Weight = WT12eBV

How many kg heavier at 12 months old than the 2005 Wapiti average

MEAT = Carcass Weight = CWeBV

How many more kg of carcass than the average 2005 Wapiti

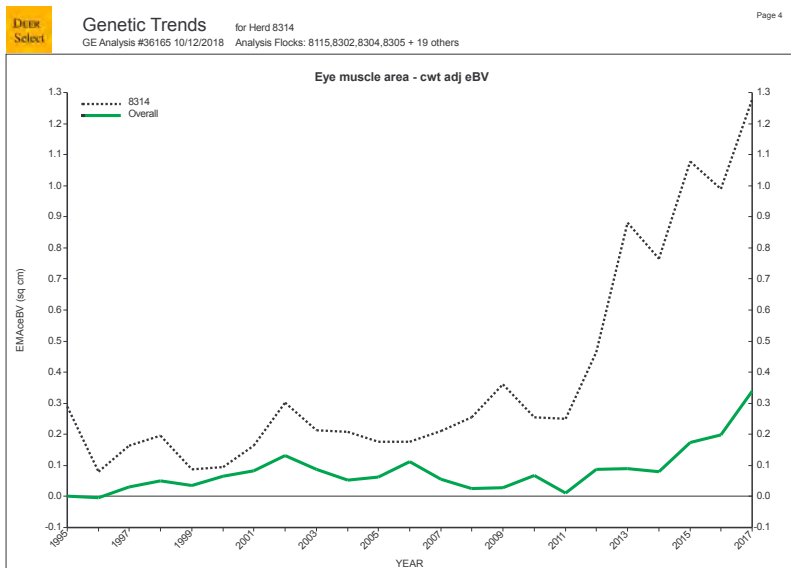

MEAT = Eye Muscle Area = EMACeBV

How much larger eye muscle/backstrap in cm² than the average 2005 Wapiti.

Selecting for this trait increases the yield of the higher value carcass cuts.

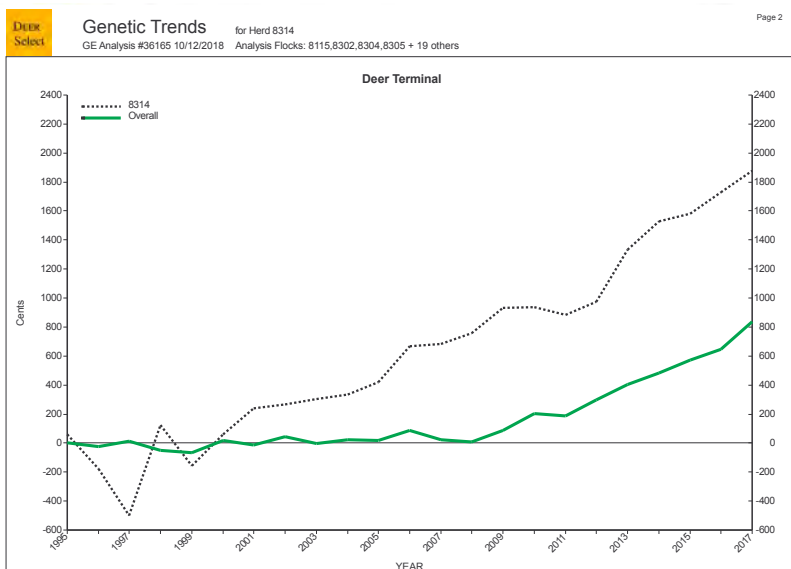

Selecting for this trait increases the dressing out percentage and the meat to bone ratio

Selecting for this trait increases tenderness of venison and eating quality

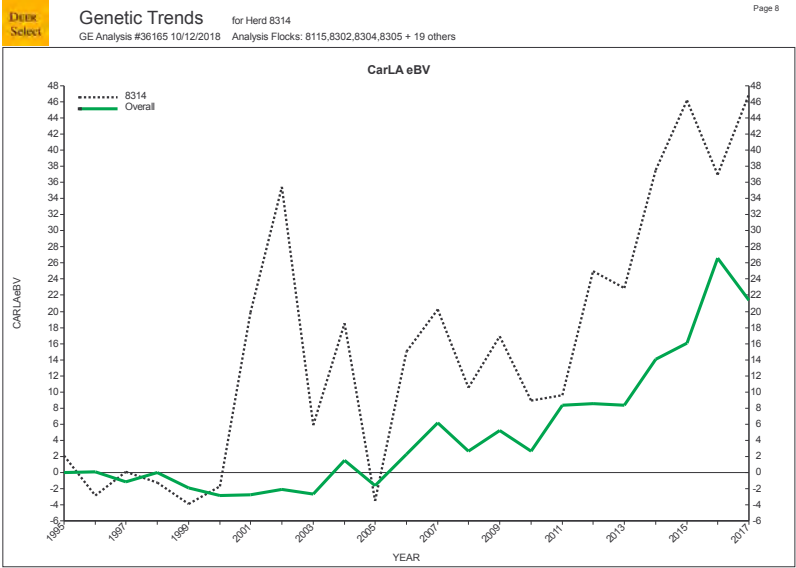

TERMINAL INDEX is a combination of growth and meat traits economically weighted.

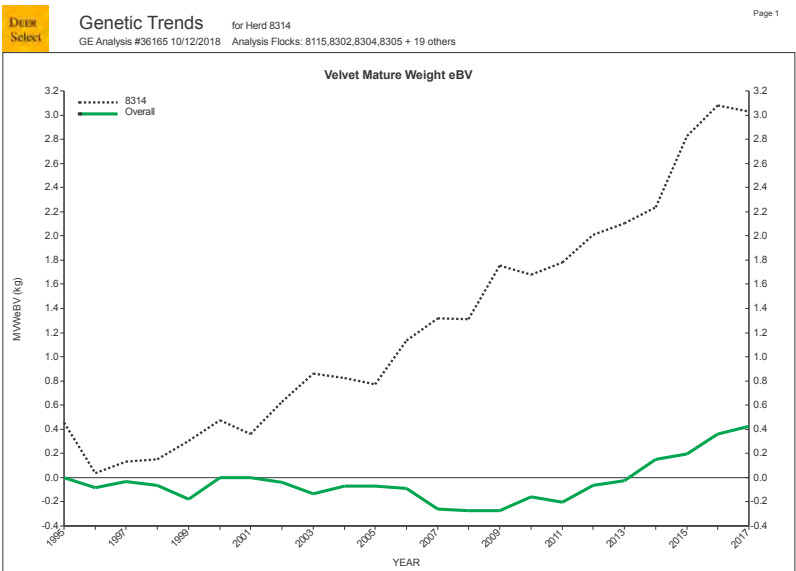

It represents how many more \$/hind mated a Wapiti bull will make you.

PARASITE TOLERANCE = the Antibody produced in saliva that occurs in response to parasite challenge = CARLA10eBV

VELVET

SUMMARY TABLE of 2019 TIKANA BULLS

The official published Wapiti Across Herd Sire Summary now means the eBV's for growth, meat, terminal index and parasite immunity can be directly compared across Wapiti herds. The Table below shows the colour code for the percentile bands for traits and Index based on all Wapiti on DEERSelect born in 2015 – 1353 deer in total. The darker the colour the better.

Using the official December 2018 DEERSelect summary of all 2015 born Wapiti as a reference point shows in the table below where this year's offering of Tikana bulls rank.

				Growth	Meat	Meat		Parasites	Velvet		Dec-18

The Tikana herd has been fully recorded on DEERSelect since 2005 and where appropriate we have been selecting based on eBV's (estimated Breeding Values) generated since 2010. An eBV is the genetic merit of an individual for a given trait once all environmental factors are removed. eBV's put a figure on the genetic worth of an animal for a given trait and indicate the amount that the progeny of that animal will gain or lose for that trait. They are an invaluable tool for selection.

Please note the eBV values in our catalogue are only comparable to other Wapiti herds.

Standardisation of Catalogue information

A consensus has been agreed to between Wapiti breeders regarding parameters for performance data entered in our sale catalogues. We have all agreed to use standardised weighing times. Growth rates will be based on actual birthdates (or derived from foetal aging), estimated birth weights of 17kg for male calves and 15.5kg for female calves and their 12mth/December weight.

Animal Inspection

Inspection prior to sale by arrangement with Ben Beadle, or Dave Lawrence. On the day of sale, stock may be viewed from 2.00pm.

Velvet

Velvet from sale bulls will be on display on sale day and remains the property of the vendor.

Tb Status

Tikana has a C10 status. We are on triennial testing. Last whole herd test was completed on 15/8/17.

Grazing

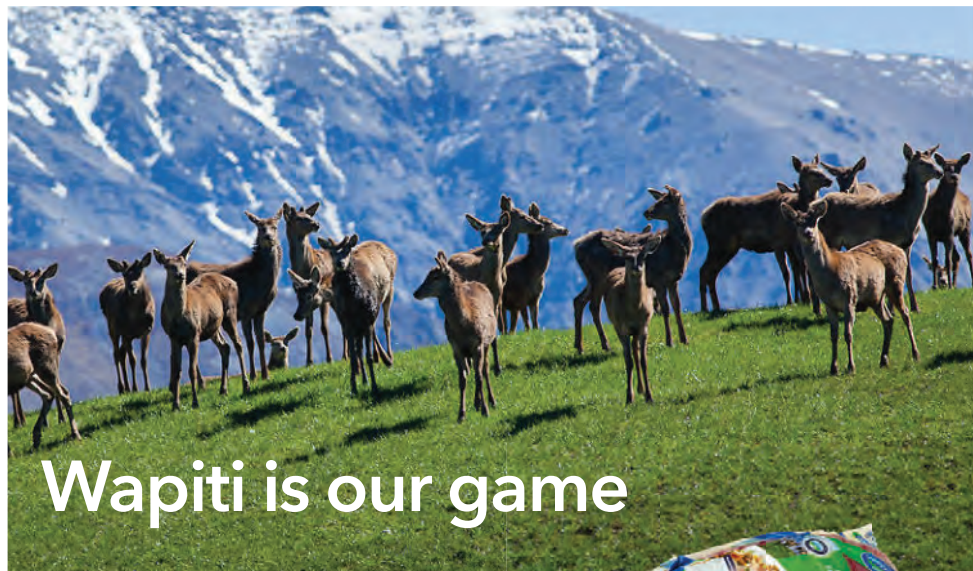

Grazing is available for a limited period, while purchasers await transport arrangements. Any grazing arrangements must be made with PGG Wrightsons office on sale day. All care and no responsibility. All deer must be insured.

Insurance

Transit and Livestock Insurance can be arranged by the Auctioneers who recommend these insurances to all purchasers. PGG Wrightson Aon Insurance will be available on the day.

Guarantee

If a bull proves to be sterile, it will be replaced by an animal of similar quality or the purchase price refunded. The guarantee refers specifically to sterility and not to any other condition due to accident or illness. No claims after 12 months of sale.

Wapiti is our game

- Wapiti marketing programme for 70-100kg Cervena qualifying carcasses.
- More than 20 years focus on farming, processing and marketing venison
- State of the art venison processing facility at Rakaia
- Premium value niche markets around the globe

Our supply chain relies on strong relationships with committed suppliers in the local region and further afield.

CONDITIONS OF SALE

1. The sale will be conducted by PGG Wrightson with the conditions of sale as set down by the New Zealand Stock and Stations Agents Association, a copy of which is exhibited in the office on sale day.
2. Each lot becomes the purchaser's property and risk at the fall of the hammer.
3. Warranties and Insurance are covered under separate headings.
4. Terms are strictly cash unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days of sale shall bear interest, at current rate per annum from the date of sale.
5. The sale is conducted exclusive of GST.
6. A buyers commission of 4% is payable to non-participating companies and recognised independent agents introducing and accompanying purchasers to the sale providing prior arrangements (No later than 24hrs prior to sale) are made with PGG Wrightson.
7. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
8. Except as otherwise expressly provided in these conditions, no guarantee, representation or warranty of any kind is made or given as to the soundness, condition or other quality of any livestock sold in this sale.

Disclaimer

All details and descriptions as to stock referred to in this catalogue have been supplied to PGG Wrightson by the vendor and have not been independently verified by PGG Wrightson. PGG Wrightson, its employees and agents make no representations or warranties or acknowledgement of any kind whatsoever in relation to any part of this catalogue (including but not limited to accuracy or completeness of details and descriptions of stock {and other contents}).

Purchasers, advisers and all other persons viewing or dealing with the stock must make their own assessment on the stock and the information in this catalogue.

PGG Wrightson, its employees and agents are not responsible or liable in any way whatsoever, whether in contract, tort (including negligence), or otherwise, to any person for any loss or any damage whatsoever arising directly or indirectly from any information or misrepresentation included or omitted from this catalogue.

Genomic Opportunities for NZ Deer

For 20+ years GenomNZ has been conducting parentage analysis for the NZ Deer Industry. We offer a new SNP based parentage test, containing tens of thousands of markers providing a more accurate parentage assignment.

This sequencing method provides precise genomic relationships and breed composition, as well as parentage analysis.

Ear tissue punches are our preferred sampling method (Allflex TSU). This sample type has been shown to provide both higher quality DNA as well as potential on-farm benefits.

Terms for Lots 25 to 30

- All cows are rearing a calf this season
- Wapiti cows **Lots 25,26,27,28**, will be mated to **Crikey**
- Wapiti cow **Lot 29** will be mated to **Legend**
- Wapiti cow **Lot 30** will be mated to **Thor**
- Cows will be pregnancy scanned in May
- Purchaser will be liable for 25% of auction day bid at fall of hammer
- Balance due following notification of positive scan result
- Possession taken in June
- The 25% deposit will be refunded if Negative pregnancy scan

How good are these MA Wapiti Cows?

The Genetic Trend graphs at the front of the catalogue show where the average Wapiti herd sits for any given trait or index

- **Growth** (WT12eBV) the average of these six Tikana cows is almost **double** that of all other Wapiti herds
- **Carcass Weight** (CWeBV) the average of these six Tikana cows is more than **double** that of all other Wapiti herds
- **Meat** (EMAcBV) the average of these six Tikana cows is more than **quadruple** that of all other Wapiti herds
- **Terminal Index** (TI) the average of these six Tikana cows is more than **double** that of all other Wapiti herds – twice the \$\$
- **Velvet** (MVWTeBV) the average of these six Tikana cows is **5 times** that of all other Wapiti herds

Plus they will be mated too.....
