

# TIKANA

SOUTHLAND NEW ZEALAND

MONDAY JANUARY 16th 2023, 3.30PM

**ON FARM SALE OF ELK/WAPITI SIRES  
YEARLING AND ADULT COWS**

***"your genetic key to profit"***

**bidr**

Nau mai, haere mai ki Tikana

Welcome to our 2023 on farm sale at Tikana.

We live in challenging times but the endless opportunities that arise make for an exciting future. Global warming affects both our urban customers and us on farm. To make progress we must embrace change.

Venison will always appeal to the discerning consumer and being able to tell our story will tick all the boxes to ensure a financially sustainable future for deer farming. How we farm our deer and manage the environment where they are farmed are critical factors for our future.

Technologies to help reduce our GHG emissions are in the pipeline and in the interim continuing to focus on efficiencies will help. Take advantage of the Tikana genetics on offer.

On the genetic front we have introduced a new (for us) meat trait. All the genetic gurus tell us the Lean Yield eBV is the best BV for meat. This is because it uses and balances all available meat information to indicate above or below average muscling/per kg carcass weight (see further explanation on page 2).

Make sure you know the direction you want to head with your deer farming operation. Choose a stud breeder who is making genetic improvements in those traits that will help you achieve that direction.

A Genetic Trend Graph shows how a breed is performing over time for any particular trait. In the following pages the green line shows the progress of 23 Wapiti herds and the dotted line shows how Tikana is performing relative to those other Wapiti herds.

We thank past purchasers and welcome you and new buyers to our 2023 offering.

Ngā mihi

***Dave Lawrence & Donna Day***

***[www.tikanawapiti.co.nz](http://www.tikanawapiti.co.nz)***

## GENETICS AT TIKANA

Our breeding objective at Tikana is to make a difference to the New Zealand Deer Industry by producing genetically superior animals for the benefit of other deer farmers.

The Tikana herd has been fully recorded on DEERSelect since 2005 and where appropriate we have been selecting based on eBV's (estimated Breeding Values) generated since 2010. An eBV is the genetic merit of an individual for a given trait once all environmental factors are removed. eBV's put a figure on the genetic worth of an animal for a given trait and indicate the amount that the progeny of that animal will gain or lose for that trait. They are an invaluable tool for selection.

Aside from the obvious conformation and temperament traits we select for:-

**GROWTH** = Yearling Weight = WT12eBV = How many kg heavier at 12 months old than the 2005 Wapiti average

**MEAT = Lean yield = LEANYeBV** = the amount of lean muscle per kg of carcass, adjusted for an average 12 month carcass = the extra kg of venison boned off a carcass at a standard weight. It is the best eBV for meat as it uses and balances all available information to indicate above or below average muscling/kg of carcass weight.

**MEAT = Carcass Weight = CWeBV** = How many more kg of carcass than the average 2005 Wapiti

**MEAT = Eye Muscle Area = EMACEBV** = How much larger eye muscle/backstrap in cm<sup>2</sup> than the average 2005 Wapiti.

Selecting for this trait increases the yield of the higher value carcass cuts.

Selecting for this trait increases the dressing out percentage and the meat to bone ratio

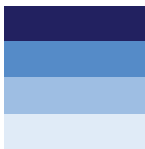

Selecting for this trait increases tenderness of venison and eating quality

**TERMINAL INDEX** = combination of growth and meat traits economically weighted. It represents how many more \$/hind mated a Wapiti bull will make you.

**PARASITE RESISTANCE** = the Antibody produced in saliva that occurs in response to parasite challenge = **CARLA10eBV** = progeny of high CARLA sires grow faster, cope better with parasite challenge, reduce pasture contamination by shedding less eggs and larvae.

**VELVET** = Mature Velvet Weight = MVWeBV also beam diameter and style. NB This is within herd only as no Wapiti herds are connected for velvet

top 2%  
top 10%  
top 25%  
top 50%  
below 50%

The official published Wapiti Across Herd Sire Summary now means the eBV's for growth, meat and terminal index can be directly compared across Wapiti herds. Using the official December 2022 DEERSelect summary of all 2019 born Wapiti (1438 deer in total) as a reference point, the table below shows where this year's offering of Tikana bulls rank.

The colour code for the percentile bands for traits and Index is based on all Wapiti on DEERSelect born in 2018, 2019 or 2020 as the case maybe.

**Please note the eBV values in our catalogue are only comparable to other Wapiti herds and not Red Deer herds at the moment.**

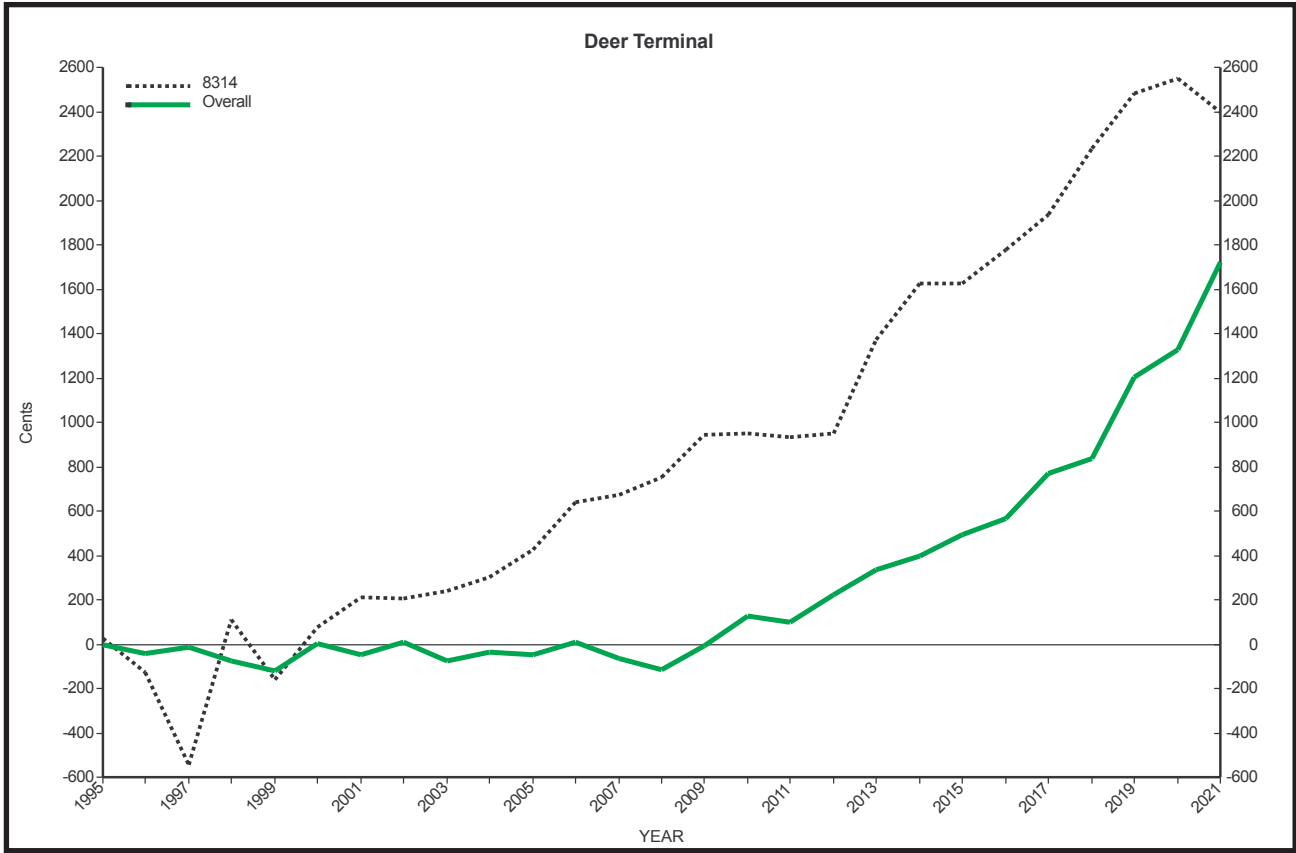

# SUMMARY TABLE OF 2023 TIKANA BULLS

# GENETIC TREND GRAPHS

The solid green line represents the Wapiti average (23 herds). The dotted line is Tikana herd average (Herd number 8314)

**TERMINAL INDEX** is a combination of growth and meat traits economically weighted. It represents how many more \$/hind mated a Wapiti bull will make you.

## MEAT = Eye Muscle Area = EMACeBV

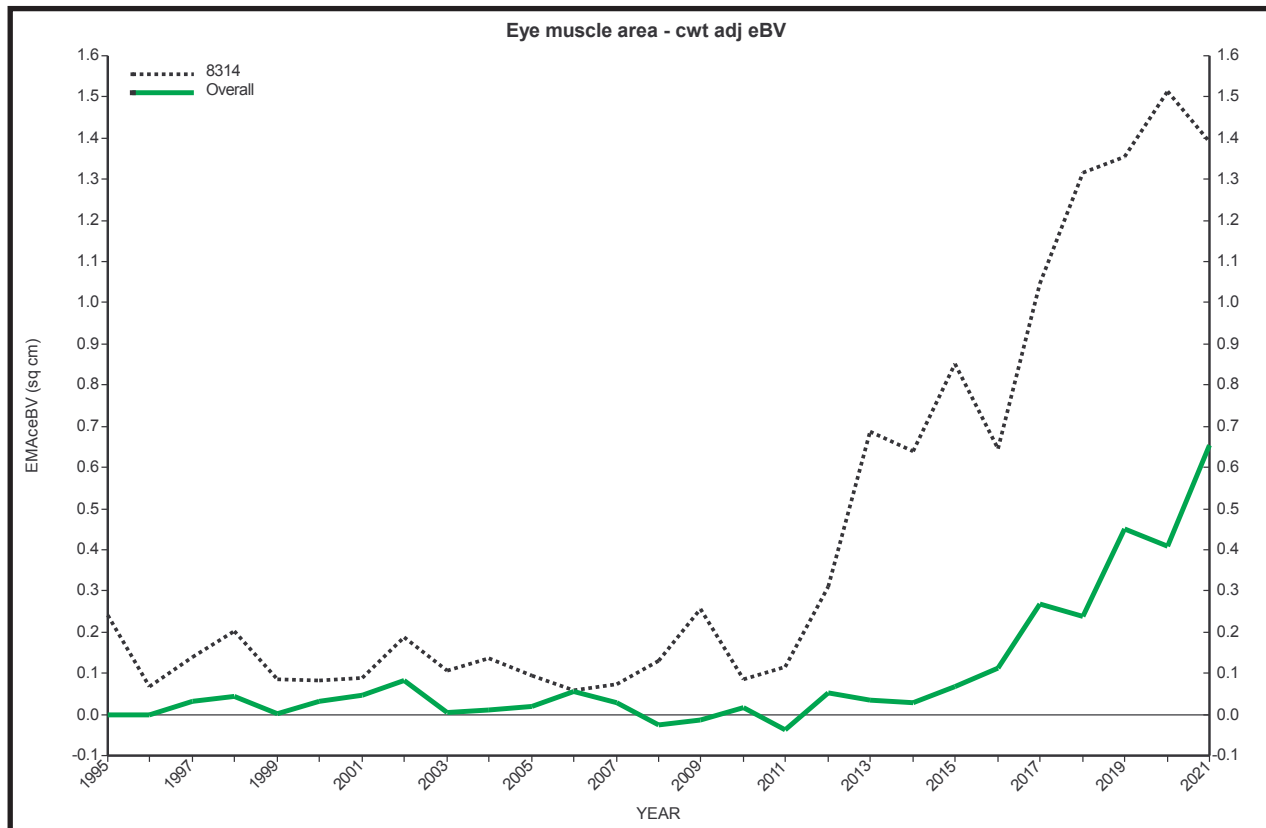

How much larger eye muscle/backstrap in  $\text{cm}^2$  than the average 2005 Wapiti.

Selecting for this trait increases the yield of the higher value carcass cuts.

Selecting for this trait increases the meat to bone ratio

Selecting for this trait increases the dressing out percentage

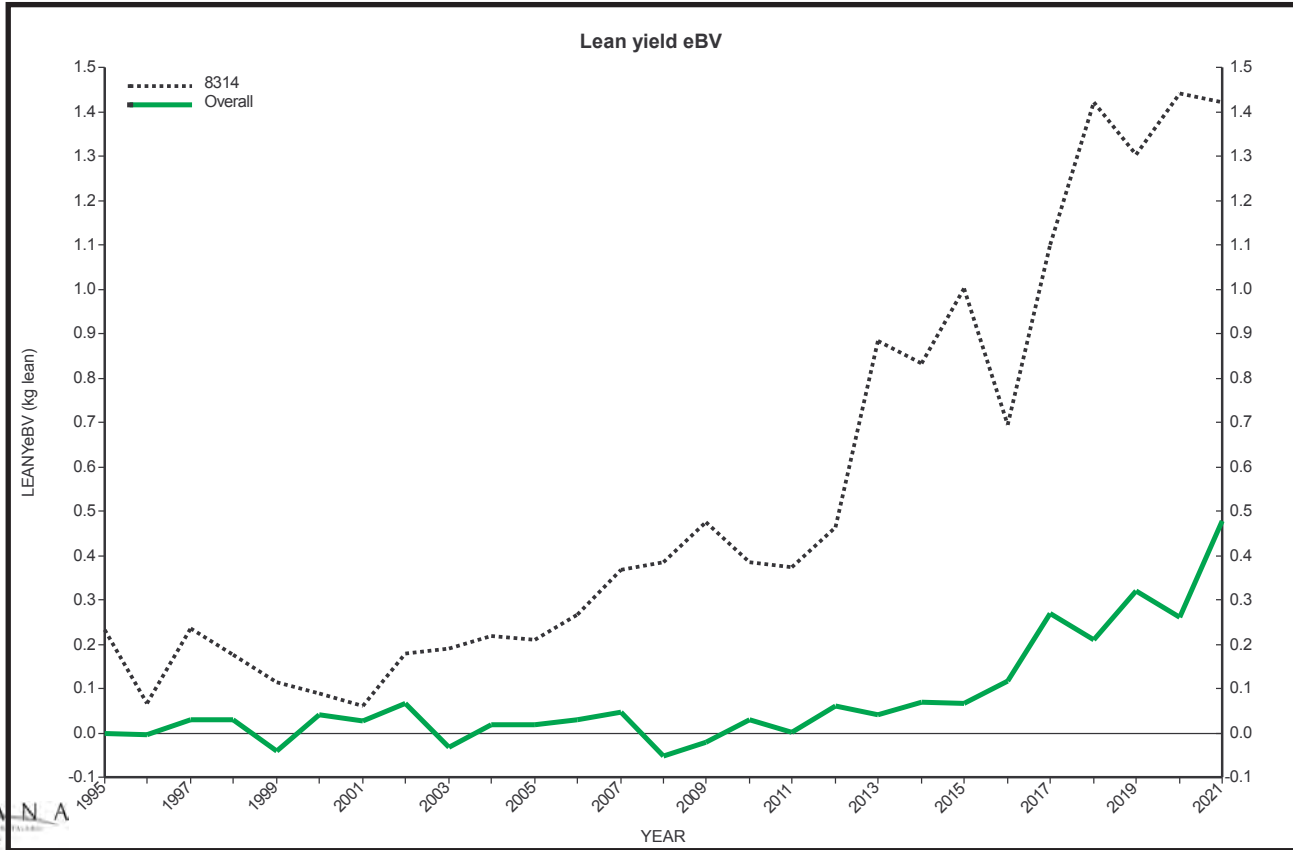

Selecting for this trait increases tenderness of venison and eating quality

# **MEAT = Lean Yield = LEANYeBV**

The Lean Yield BV is an expression of the amount of lean muscle per kg of carcass, adjusted for an average 12-month carcass.

The **LEANYeBV** balances all available meat information to indicate above or below average muscling/per kg carcass weight.

**GROWTH = Weaning Weight = WWTeBV** How many kg heavier at Weaning/March than the average Wapiti in 2005

**WE ALSO SELECT FOR:**  
**GROWTH = Yearling Weight = WT12eBV** How many kg heavier at 12 months old than the 2005 Wapiti average  
**MEAT = Carcass Weight = CWeBV** How many more kg of carcass than the average 2005 Wapiti  
**VELVET = Mature Velvet Weight = MVWeBV**

## **Standardisation of Catalogue information**

A consensus has been agreed to between Wapiti breeders regarding parameters for performance data entered in our sale catalogues. We have all agreed to use standardised weighing times. Growth rates will be based on actual birth dates (or derived from foetal aging), estimated birth weights of 17kg for male calves and 15.5kg for female calves and their 12mth/December weight.

## **Animal Inspection**

Inspection prior to sale by arrangement with Ben Beadle, or Dave Lawrence. On the day of sale, stock may be viewed from 2.00pm.

## **Velvet**

Velvet from sale bulls will be on display on sale day and remains the property of the vendor. Please use gloves provided if you wish to handle the velvet.

## **Tb Status**

Tikana has a C10 status. Last whole herd test was completed on 8/8/2019 and no longer whole herd test as we are in a Surveillance Disease Control Area.

## **Grazing**

Grazing is available for a limited period, while purchasers await transport arrangements. Any grazing arrangements must be made with PGG Wrightsons office on sale day. All care and no responsibility. All deer must be insured.

## **Insurance**

Transit and Livestock Insurance is recommended. Insurance agents will be present on the day to meet your requirements.

## **Guarantee**

If a bull proves to be sterile, it will be replaced by an animal of similar quality or the purchase price refunded. The guarantee refers specifically to sterility and not to any other condition due to accident or illness. No claims after 12 months of sale.

## CONDITIONS OF SALE

1. The sale will be conducted by PGG Wrightson with the conditions of sale as set down by the New Zealand Stock and Stations Agents Association, a copy of which is exhibited in the office on sale day.
2. Each lot becomes the purchaser's property and risk at the fall of the hammer.
3. Warranties and Insurance are covered under separate headings.
4. Terms are strictly cash unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days of sale shall bear interest, at current rate per annum from the date of sale.
5. The sale is conducted exclusive of GST.
6. A buyers commission of 4% is payable to non-participating companies and recognised independent agents introducing and accompanying purchasers to the sale providing prior arrangements (No later than 24hrs prior to sale) are made with PGG Wrightson.
7. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
8. Except as otherwise expressly provided in these conditions, no guarantee, representation or warranty of any kind is made or given as to the soundness, condition or other quality of any livestock sold in this sale.

# Genomic Opportunities for NZ Deer

*For 25+ years GenomNZ has been conducting parentage analysis for the NZ Deer Industry. We offer a SNP based parentage test, containing tens of thousands of markers providing a more accurate parentage assignment.*

This sequencing method provides precise genomic relationships and breed composition, as well as parentage analysis.

Ear tissue punches are our preferred sampling method (Allflex TSU). This sample type has been shown to provide both higher quality DNA as well as potential on-farm benefits.

#### **Hinds and Stags**

Profiling, breed composition  
\$27.50 per sample  
All prices excluding GST

#### **Calves**

Full pedigree, breed composition  
starting at \$25.85 per sample

## DEER Select Bureau

Advice, systems and technologies to  
improve deer herd performance

- The recording process is made as easy as possible for you
- Easy to use paper or electronic templates if required
- Reports relevant to the data received are returned to you after each set of data is analysed.
- Updated reports in your chosen format are available on request at any time.
- Reports tailor made for you and your breeding objectives
- Technical advice

# Tikana Yearling NZ Wapiti and NZ Elk Cows

- DNA with gBreed indicates 160/21 and 161/21 are New Zealand Elk Cows = Pure – a rare opportunity
- Expectation the sire of 160/21, 161/21 and 168/21 was an imported Canadian Elk Bull. As Expectation was not previously registered on DEERSelect it means by default he is allocated a zero value for his BVs. Therefore the BV values for these three daughters will be understated.
- 161/21 - her dam's full brother this year cut 19.5kg EWSupreme at 5 years
- 134/21 – is out of a first calver and has strong trophy genetics. Grand-Sire Seattle, a trophy bull from Edendale Station held the world record hard antler score of 586 IOA typical as an 8 year old.
- 166/21- a daughter of Prophecy who cut a NZ record of 21.5kg EWsupreme at 4 years old.

## Terms for Lots 24 to 29

- Wapiti cows will be mated to high quality Tikana Bulls
- Cows will be pregnancy scanned in May
- Purchaser will be liable for 25% of auction day bid at fall of hammer
- Balance due following notification of positive scan result
- Possession taken in June
- The 25% deposit will be refunded if Negative pregnancy scan

## How good are these MA Wapiti Cows?

The Genetic Trend graphs (some are displayed in the front of the catalogue) show where the average Wapiti herd sits for any given trait or index

- **Growth** (WT12eBV) the average of these six Tikana cows is + 14.9kg which is **50% higher** than that of all other Wapiti herds
- **Meat** (EMAcBV) the average of these six Tikana cows is 1.6cm<sup>2</sup> which is **2.5 times** more than that of all other Wapiti herds
- **Terminal Index** (TI) the average of these six Tikana cows is **\$26.89** which well **over 1.5 times** that of all other Wapiti herds
- **Parasite Resistance** (CARLAeBV) the average of these six Tikana cows is **+156** which is **7.5 times** more than that of all other Wapiti herds
- **Velvet** (MVWeBV) is within herd only.

**407/14** - has had two sons whose 2yr velvet cuts were 5.3kg & 6.0kg

**410/14** - has only had one son who cut 6.9kg @ 2 years. Great opportunity for trophy genetics - Her sire Storm is awaiting official confirmation of a 525 trophy score.

**543/15** - has had three sons whose 2yr velvet cuts were 5.4kg, 5.9kg & 7.0kg

**604/16** - no sons but half brother Thorn in bulls above - cut 6.7kg @ 2 yr and 10.9kg @ 3 yr

**841/18** - no sons but half sister out of same dam mated to Malakai cut 9.4kg @ 2 years

**875/18** - no sons but half brother cut 6.1kg @ 2 yr. Trophy potential with Hashtag as sire (North American champion Korean Gold was his grandsire)
